Project Description

Put the description of your project here - 1 paragraph will suffice.
Do mention who your target users are.

Retirement Home – Assisted Living

Target Users: Future Senior residents, family of residents, current seniors living in assisted living facilities, caregivers, volunteers, insurance providers, and local communities.

Description:

A retirement home website called “Horizon Living” would serve and connect possible residents and families. The website would advertise a location and provide information and resources about it. The website would have to be user-friendly considering our audience.

The website would prioritize the needs of residents and accessibility to make this website easy to navigate. We would showcase our facilities, accommodations, staff, pricing, tours and contact information to help residents decide if this is the home and community right for them. We would have health services and wellness programs that are available for current residents at our facility. We would host a blog/gallery tab to show families to have updates or community events that were hosted. This website would create an accessible space for anyone looking for a retirement community.

Possible benefits of the project

List the benefits that you foresee the project will bring to the intended user base.

1. Helping seniors in need of assistance.
2. Elders who cannot take care of themselves
3. Families who do not have space for their elderly
4. Elders with no family connections
5. Families who are incapable of caring for their elderly
6. Helping Elders with disabilities
7. Allowing people who are alone to have a place to be welcomed
8. Helps elderly people obtain their medical needs easily
9. Provide a community for people of diverse walks of life
10. Provides a place for families to visit their elderly and know they are well taken care of
11. Gives a sense of security to elders

Current/similar Solutions

List of similar sites.

<https://www.bellevuewsl.com/>

<https://www.legacyatwaltontrail.com/>

1. If none exists, you need to mention that your site is the first of its kind.
2. If any exists, then mention how your site would be different from those so that people know you are merely re-inventing the wheel.

How our site would differentiate from the rest:

We could add a community events calander and a facility news page. We could have a reviews tab where potential clients could read reviews from current residents. A cost-estimator tool is also something that would be different from similar sites.

Estimated duration of the project

6 Months

UI/UX and User-Centric aspects of the project

List the things you will do to make the site user-centric and UX compliant.

1. Use large font for easy reading
2. Simple layout that is not confusing
3. Clear heading/navigation
4. Clear and consistent colors, icons, and imagery.
5. Prominent Contact Us section with multiple ways for people to reach out for more information.
6. Descriptive links
7. Alt. Text for images to make the site accessible to the visually impaired.
